TECHNICAL PARAMETERS

SINGLE TABLE

We offer three standard versions. They are ideal for smallscale production or serve as the basis for unlimited expansion of the surface of the welding station.

EXTENDABLE SINGLE TABLE

Each table from our offer can be unfolded thanks to sliding plates and the use of additional legs.

DOUBLE TABLE

The most popular sets are sets composed of two single tables. The design of the tables allows expansion in every direction.

SET WITH A LARGE WORK SURFACE

Connection of two unfolded tables by means of connectors are the perfect solution for the spatial construction.

ADVANTAGES AND BENEFITS OF MODULAR TABLES

PERFECT FLATNESS

Due to the possibility of adjusting the height of the countertops through spacers, the operator can set a perfect working surface of the table. This solution allows the user to use the table for many years while maintaining a perfect surface of the countertop.

HOLE AND SLOT MOUNTING TOOLS

Ø28 holes are standard in the table in a 100x100mm grid. Besides, the design of our modular tables allows you to increase the number of places for mounting tools in the gaps between the top plates - increased ergonomics.

ADJUSTABLE PLATES

We can move them by increasing the working surface, as well as exchanging them for new ones, which affects the various adaptation of the table to the currently performed works and longevity of use.

ADVANTAGES AND BENEFITS OF MODULAR TABLES

INCREASING WORKING AREA

Done by sliding plates (as above), but above all, we obtain it by quickly joining together many tables in table set. The working area can be expanded in different directions. The operator can adjust the arrangement of tables depending on the current location in the production hall.

ADJUSTABLE TABLE HEIGHT

Range from 850mm to 1150mm, every 50mm. The possibility of adapting the station making an impact on the ergonomics of work for many operators.

FLEXIBILITY OF THE NUMBER OF WELDING STATIONS

A variety of configurations, increasing the space by joining them, as well as increasing the number of positions by diving them.
